

UNSEENLABS

UNSEENLABS

European leader in *Satellite Borne RF ELINT/SIGINT*

Chronology

2015
Creation of UNSEENLABS

2018
Fundraising 7,5 M€

2019
Launch of BRO-1
Launch of commercial service

2020
Launch of BRO-2 & BRO-3

2021
Fundraising 20 M€

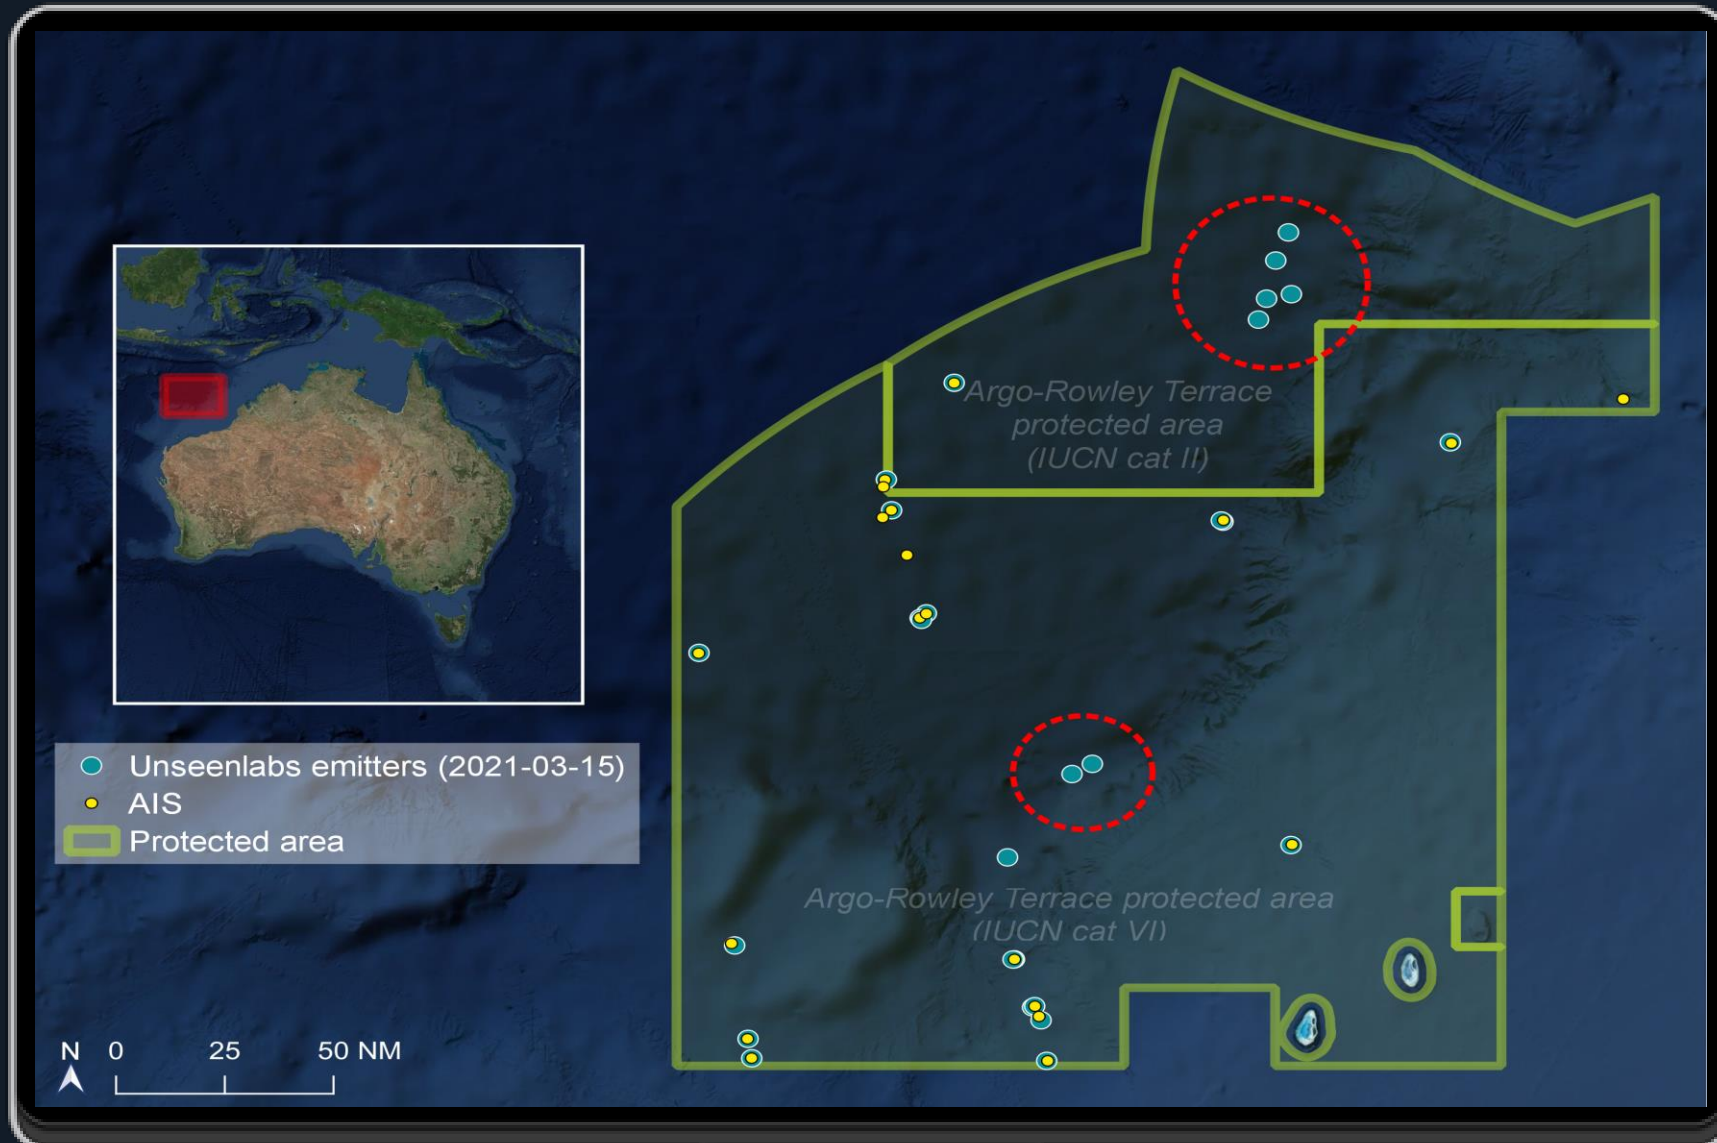

2021+
New satellite
launches
& new services

UNSEENLABS

Real data- Use case example

ITU applications challenges

UnseenLabs' *atypic constellation* compared to ITU industry standards:

On-purpose *chaotic-style orbital* deployment: non-phased altitudes & inclinations

=> We are not on Telecom/IoT neither classic Earth observation businesses

Frequent and *opportunistic* satellites launches:

=> We deal with all rides & orbits compatible, often with only months/weeks of prior notice

Proprietary ground station + use of ground *stations as-a-service*

=> We anticipate but our ITU applications evolves over time
